(54) REPRESENTATIVE SIMULTANEOUS CALLING SYSTEM

(57)Abstract:

PURPOSE: To improve convenience for a fixed subscriber by selecting a mobile machine nearest to an originating call fixed subscriber from among plural mobile machines and receiving a batch calling.

CONSTITUTION: Only by selecting a representative number DN1 by a fixed subscriber 1, a mobile machine (MSS) 812 or 811 existing in an identical simultaneous calling section (MPPN) 91 with the fixed subscriber 1 or an adjacent simultaneous calling section (MPPN) 92 in a responsible state is selected and called. Therefore, there is no need to repeat calling operation until the fixed subscriber 1 encounters the MSS 8 in the responsible state, and the taxi waiting time for the fixed subscriber 1 is shortened. Thus, since the MSS 8 nearest to the originating call fixed subscriber 1 is selected from among plural MSS 8 to receive the batch calling, the convenience for the fixed subscriber 1 is improved.
